

When it comes to **BMW Repair** or **BMW Maintenance** anywhere in **Orange County**, Camino Import Auto should be your very first choice. We service, maintain and repair all BMW makes and models. Our long-time clients will tell you that we are Orange County's number one BMW repair and BMW maintenance shop. We use the latest technology to repair or maintain your BMW and all of our Orange County BMW repair technicians are ASE certified so you know your import auto is in good hands with Camino Import Auto.

The BMW Maintenance System is devised using the following objectives: maximize vehicle safety, reliability, and minimize breakdowns resulting from wear, at minimum cost. The Service Interval Light system indicates when you are due for service.

Service Interval Light System

The Service Indicator consists of five green, one yellow, and one red light and the inscriptions: "Oil Service" and "Inspection", located on the instrument panel.

Whenever the ignition is switched on, up to five green lights will light up, then depending on vehicle use and driving style the green lights will systematically turn off one by one. As you approach the last green light, this is an indication that the next service is almost due and helps you to make any necessary arrangements on a timely basis.

When the last green light turns off, a yellow light appears with one of the inscriptions (Oil Service or Inspection). This indicates that your next maintenance service is due immediately.

If you continue to delay maintenance service, the yellow light and red light appear together with one of the inscriptions (oil service or inspection). In the interest of road safety and reliability you should avoid driving your BMW and have the essential work performed without any further delay.

We take great care in following and exceeding BMW's maintenance guidelines in order to maintain superior handling, ultimate performance, and most importantly safety and reliability for you and your BMW. However the real value of our service is our expertise and familiarity with the problem areas, common failure points, and the practical service needs of your particular

Orange County BMW Repair and Maintenance

Written by Camino Import

BMW model. We even use Autologic Diagnostics for BMW - this gives us the ability to do anything the dealer can.

Our Standard Maintenance Service follows BMW's factory guidelines step by step and meets all BMW factory warranty requirements. Please refer to your owner's manual for a detailed description of these services for your exact model year or follow recommended mileage indicators.

Interval Based Service Package List:

The BMW service intervals consist of three main service groups.

- Oil Service: Engine oil and filter change and additional preventative maintenance services.
- Inspection I: Major vehicle maintenance as specified in your Service Booklet.
- Inspection II: Additional major vehicle maintenance as specified in your Service Booklet.

Also, there are additional services that are required which consist of: (These are excluded from the main service groups.)

Brake fluid flush every two years

Coolant fluid flush every three years

If your BMW is equipped with a timing belt (M20 engine), the timing belt should be replaced every 4 years or 50,000 miles which ever occurs first.

Oxygen sensors get tired over time and should be replaced after 100,000 miles.

We pride ourselves in being the South Orange County's Premier BMW Service center. We handle both BMW maintenance and inspection services. Let us make your BMW service experience as hassle free as possible. BMW genuine parts and accessories are all available at Camino Import Auto Service.

Customer satisfaction is our number one goal. Our well-trained certified professional technicians will use the most updated tools & equipments to service your BMW.
